

With the forecast suggesting light winds, clearing skies and with the ground drying nicely we ventured out to our private easterly training slope with George and Dean on their Taster Day. After a bit of paper work we got stuck straight in and within an hour both were getting their feet off the ground.

We also had out with us Mike and Ben, Mike is on his CP course while Ben just needs to sit his exam to complete his EP.

A great day was had by all with both George and Dean completing over 15 flights each, it does help to be only 17 hey George. Ben managed lots of Top to Bottoms using the reverse launch technique and Mike completed his first soaring flight of over 15 mins.

Some pictures and video below.

P.S for those of you waiting for a report on Lanzarote it's on its way with a video and pictures as well. Lee
